# Project

**APPROVED**

Your project is approved.

Teams will work on preparing a preliminary website for the client.

Use Trello to assign tasks and monitor progress.

Class 13 & 14 (Feb 21 & 22) – Website

2. Based on approval of the project, realize the first sprint to prepare a preliminary version of the website.  
Validate the html and css. Name the zip file of the website TeamXProject.zip
3. Update the Trello board with the results of the sprint. **Include the updated Trello board in the presentation.**

Class 15 (Feb 23) – Presentation

# Project – Steps 2 and 3

Class 13 & 14 – Steps 2 & 3 Website – see Project details on Lea

## Client interview

Client: Hi, I would like to improve the website for my restaurant. Are you able to do that?

Consultant: Yes, I checked your website and I see that you already have a menu.

Client: Yes, we display the menu, but we would really like to improve the look.

Consultant: Did you want to display pictures of the menu items?

Client: Yes, and even details that show the recipe ingredients.

Consultant: What else do you have in mind?

Client: I would like a very inviting home page with our hours and location, and an About Us to show our background, chefs, and management team. In addition to the menu of our specialty dishes, I would like to show the details of those dishes. Do you think you could have something ready by February 23rd?

Consultant: I will check with my team and get back to you with our estimate and timeline.

Client: Thanks, have a good day!

Consultant: Thanks, you too.

## Steps:

1. In a team, read the client interview and prepare a report in Word detailing the project requirements. The report will contain a summary of the user requirements, a Visio diagram of the sitemap, a Kanban style Trello board detailing the proposed first sprint of the project and an Excel chart showing the project estimate of time and cost based on 5 consultants. Name the report TeamXReport. Use a folder named Project (in your Teams Meeting Room Files) to contribute content to the project. Add a confidential watermark to the report.
2. Based on approval of the project, realize the first sprint to prepare a preliminary version of the website. Validate the html and css. Name the zip file of the website TeamXProject.zip
3. Update the Trello board with the results of the sprint. **Include the updated Trello board in the presentation.**
4. Presentation of project. Presentation should not be more than fifteen minutes and should include reference to all the documents above. Name the presentation slides TeamXPresentation.pptx

Deliverables:	Due:
1. Report containing:	February 9
a) User Requirements	
b) Sitemap	
c) Sprint 1	
d) Schedule and Cost	
2. Website (preliminary version)	February 23 at 10am
3. PowerPoint Presentation Slides	February 23 at 10am
4. Team Presentation	In class on Teams on February 23 at 11am
5. Self and Peer Evaluation	February 23

# Project – Team Meetings

9:15-9:30 – Daily Stand-up Meeting

Three questions:

- What did I work on yesterday?
- What am I working on today?
- What issues are blocking me?

Update Trello to monitor progress.

Be sure to check in with your team at the following time.

11:00-11:10 – Team 3 check-in

11:10-11:20 – Team 2 check-in

11:20-11:30 – Team 1 check-in

11:30-11:40 – Team 6 check-in

11:40-11:50 – Team 5 check-in

11:50-12:00 – Team 4 check-in

# Looking Ahead

- Class 15 (Feb 23) 9:00 – 10am – Prepare PowerPoint slides
- Class 15 (Feb 23) – Presentations starting at 11am
- Class 15 (Feb 23) – Self and Peer Evaluation
- Deliverables

2. Website (preliminary version)	February 23 at 10am
3. PowerPoint Presentation Slides	February 23 at 10am
4. Team Presentation	In class on Teams on February 23 at 11am
5. Self and Peer Evaluation	February 23

- One website zip file per team
- One PowerPoint file per team
- Participation from every team member in the presentation
